DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/23/03 has been entered.

Response to Amendment

2. The reply filed on 7/23/03 is not fully responsive to the prior Office Action because: It proposes to amend claim 3, which is non-existent in the present application. Applicant is required to make the record clear by canceling claim 2 and treating claim 3 as a new claim instead of an amended claim in the next communication. In order to advance prosecution, the examiner has assumed claim 2 has been canceled and new claim 3 has been added to the present application.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer

Art Unit: 2837

coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claim 3 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6392374. This is a double patenting rejection.

The examiner compared the language of claim 3 of the instant application to patented claim 1, the only difference between the patented claim and the pending claim is the word "independent" added before the phrase --means for actuating—. This new added word does not differentiate the invention recited in pending claim 3 from the already patented invention of claim 1; the <u>independent means</u> for actuating the switch of pending claim 3 has the exact same function of the means for actuating the switch of patented claim 1, applicant must amend pending claim 3 in order to overcome this rejection.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claim 1 is rejected under the judicially created doctrine of obviousnesstype double patenting as being unpatentable over claim 5 of U.S. Patent No. Art Unit: 2837

6392374. The only difference between the two sets of claims is that the issued claim is narrower or more specific, the issued claim recite other structural components of the device for controlling the motor that are not recited in the pending claims. The invention recited in the pending claim is an obvious variation of the invention recited in the already issued claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Carle et al (US Patent 4272708).

Carle et al describe a window lifter comprising switches 12 and 13 for controlling the power through motor 10 and actuating means 20 for actuating the switch based on the movement of the window, wherein said actuating means comprises mechanical devices such as means 31 and 32 for taking different states when switches 12/13 are opened or closed and means 14 for changing the state of the bistable means 31/32 by manually operating the window.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The documents cited teach other control systems for controlling a movable object.
